DOOSAN ORIGINALS

**REPLACEMENT FANUC
COMPONENTS**

Our technicians performed a Retrofit on a Doosan machine at one of our customers recently.

The following work was carried out:

- **replacement of the motor, drive and cables**
- **modification of the PLC**
- **created reset procedures for the original**

ASSISTEC

ELECTRONIC ASSISTANCE

The **benefits** are tangible:

- Modern, highly reliable technology
- Spare parts available in record time of 24/48 hours
- Favourable costs compared to the Pro-Motion/Vision system
- Simplified day-to-day handling of turret-related challenges such as accidental collision and the need for phasing
